## About me

I am a passionate web developer interested in the newest technologies and trends. Highly motivated and eager to learn about new tools and become a better software engineer. Continually learning best practices in programming so my code can work smoothly and be easily understood. Constantly improving my soft and technical skills so I can help others start their programming journey or improve their careers in the software development world.

## Experience

**12/2022 - present**
**Software Development Academy - Trainer**
- Teaching web technologies like HTML, CSS, Javascript, ReactJS, NodeJS.
- Helping people who want a professional reconversion or want to become web developers to understand programming concepts and tools.

**06/2022 - 04/2023**
**SII Romania - ReactJS Developer**
- Working with an international client in a fully remote setup.
- Developing UI React components and pages.
- Managing the user flow.
- Interacting with a REST API to consume the data we need.

**Project: Job Listing**
Description: Internal job managing application.
Technologies: React JS, Context Api, NPM, Git, Firebase.

**05/2021 - 05/2022**
**Cognizant Softvision - Software Engineer**
- Working with various Javascript tools and frameworks such as React JS and Node JS.
- Developing and refactoring reusable components.

- Writing unit tests for implemented tasks using react testing library.
- Participating in all Agile ceremonies.
- Presenting to the stakeholders and colleagues from other teams the tasks I implemented at the sprint demo.

**Project: Multi Factor Authentication**

Description: Login application for a big pharmaceutical company.

Technologies: React JS, Context Api, Node JS, Express JS, Jest, SAP Gigya, Mongo DB, NPM, Git, Jira.

**Project: Microservices**

Description: A suite of microservices facilitating the connection between a mobile application and external API's.

Technologies: Node JS, Express JS, Redis, Jest, NPM, Git, Jira.

**Project: Customer**

Description: Application where a user can create appointments for different vaccination services.

Technologies: React JS, Redux, Jest, NPM, Git, Jira.

**10/2020 - 05/2021**

**Sparktech Software - Front end developer**

- Worked on a number of 6 presentational applications, that are best described as "PowerPoint presentations on steroids". Each page of an application is an svg or multiple svgs put together and animated using GreenSock library.
- Making sure my code is optimised so the animations work smoothly and without issues.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products perfectly tailored for our customer's needs.

Technologies: React JS, Typescript, GreenSock, Yarn, Git, GitLab.

**06/2020 - 09/2020**

**Ciel Romania - Full stack developer**

- Developing new features requested by the clients.
- Participating in brainstorm meetings to find the best solution for the upcoming tasks.

**Project: Ciel Cloud**

Description: Accountancy application.

Technologies: React JS, Redux, Node JS, Express JS, Couchbase, NPM, Git, Jira.

**07/2018 – 05/2020**

**Ecrion International - Full stack developer**

- Bug fixing and feature implementation for company's applications.
- Working closely together with QA team to make sure that there are no issues and everything works as intended.
- Implementing responsive design and ensuring cross-browser compatibility.

- Participating in code reviews and providing constructive feedback to other developers.
- Assisted in building 100% reusable components for company's Storybook.

**Project: Email Editor**

Description: Document editor where the user could insert text, images, urls and buttons, add styles for each of them, undo or redo and save it.

Technologies: React Js, Redux, Material-UI, Draft Js, NPM, TFS.

**Project: Accounts**

Description: Application for creating, updating, deleting users and manage product keys for company's applications on the user side.

Technologies: React Js, React-Native, Material-UI, .Net, SQL, Yarn, TFS.

**Project: Admin**

Description: Internal application with the same functionality as Accounts, but on company's side.

Technologies: ASP.Net, SQL, TFS.

**Project: Statements**

Description: Web application designed for creating emails, adding attachments and sending them to multiple people at the same time.

Technologies: React Js, Material-UI, .Net, Yarn, TFS.

**06/2017 – 07/2017**

**Prodigy Technologies - Intern**

- Developed a Windows Form application.
- Created a simple web application using ASP.Net.

**07/2016 – 09/2016**

**Untangled Media, Pieta (Malta) - Intern**

- Learned web development basics (html, css, javascript).
- Created a presentational website.

# Education

Bachelor's degree, "Titu Maiorescu" University, Faculty of Informatics

# Training

- Internship's certificate – Erasmus+ Training
- FrontEnd Web Development – Scoala Informala de IT
- 2nd place – "Challenge Accepted" Hackathon
- Trainer – Structural Eurotraining
